FEVER kukui moomoo CLUBROOMS

To whom it may concern,

Over the last six or seven years dB Attenuation Ltd have provided very helpful soundproofing advice for many of my venues around the country. Recently, they have completed dry-lining projects in Northampton, Shrewsbury and Exmouth and all the site guys were very well supervised and worked professionally through to finish on time. The sound reduction in each case has been great for us and allows our nightclub business to operate normally at venues where sound-proofing has been undertaken.

Thanks again to all at dB Attenuation and onwards to the next project.

Nigel Blair
Commercial Director
